

Satellite Equipment Specifications

Welcome to the Transforming Lives Network (TLN). To receive TLN programming, it is recommended that a professional satellite installer conducts a site survey prior to purchase and installation. The Transforming Lives Network broadcasts via satellite on IntelSat's Galaxy10R, Transponder 3, Ku Band, vertical downlink polarization.

To receive the TLN channel, the following equipment is required:

- 1.2 meter (minimum) satellite dish
- Coship MPEG-4, DVB compliant decoder/receiver
- Digital-ready Ku Band LNB and appropriate feed assembly
- Mounting system for dish (wall, ground, non-penetrating roof mount)
- Cable to bring satellite signal from dish to decoder/receiver
- Installation to include correct pointing of satellite dish

Two downlink packages are available: single-channel or dual channel. If you plan to participate in the American Jail Association Program Packet, you will need to select the dual channel option.

The Coship receiver is also available separately.

Ala Carte Menu

- Coship MPEG-4 (H.264) receiver with Irdeto smartcard (P/N CDVB6750)
\$186.00 + shipping (and sales tax, if applicable)
- DX 2-way L Band Splitter with (2) 3' RG-6 Cable (P/N SPLIT-2-RG6PKG)
\$34.00 + shipping (and sales tax, if applicable)

Satellite Equipment Packages
